At Patient First, we use a variety of procedures and modalities to help us to try and improve your function. As with all forms of medical treatment, there are benefits and risks involved with physical therapy.

We are not to guarantee precisely what your reaction to a particular treatment might be, nor can we guarantee that our treatment will help the condition you are seeking treatment for. There is also a risk that your treatment may cause pain or injury, or may aggravate previously existing conditions.

You have the right to ask your physical therapist what type of treatment he or she is planning based on your history, diagnosis, symptoms and testing results. You may also discuss with your therapist what the potential risks and benefits of a specific treatment might be. You have the right to decline any portion of your treatment at any time before or during your treatment session.

Therapeutic Exercise are an integral part of most physical therapy treatment plans. Exercise are an integral part of most physical risks associated with it. If you have any questions regarding the type of exercise you are performing and any specific risks associated with your exercises, your therapist will be glad to answer them.

I acknowledge that my treatment program has been explained by Patient First, and all of my questions have been answered to my satisfaction. I understand the risks associated with a program of physical therapy as outlined to me, and I wish to proceed.
